

Is Your UPS Ready for Winter?

7 Things to Check Before the Weather Changes

Winter weather can be unpredictable. Your power protection shouldn't be. Before storms and outages put your critical equipment to the test, take a few minutes to check the health, capacity, and readiness of your UPS.

1

How old are your batteries?

What to check: Battery age and replacement history.

2

Do You Know Your Actual Runtime?

What to check: How long your equipment needs to stay online versus how long your UPS can support it.

3

Is Your UPS Carrying More Than It Used To?

What to check: Current load percentage.

4

When Was the Last Time You Ran a Self-Test?

What to check: Built-in self-test results and system status.

5

Are You Ignoring Warning Signs?

What to check: Active alarms, warning lights, error messages, and event logs.

6

Is Your UPS Environment Working Against It?

What to check: Temperature, dust, airflow, and ventilation.

7

What Happens If the Power Goes Out Tomorrow?

What to check: Your overall power protection plan.

Don't Wait for the Next Outage

A few minutes of preparation today can help uncover issues before your UPS is called into action. Make sure your power protection is ready for whatever winter brings.
