

Protected in Transit. Ready at Arrival.

Every Minuteman Power Cabinet ships on a purpose-engineered pallet system built to protect your investment from the factory floor to final installation. Reinforced construction, integrated cushioning, and built-in ramps help ensure your cabinet arrives undamaged, deploys quickly, and performs reliably with less handling time and lower risk on every project.

Fully wrapped and Secured

Fully wrapped, labeled, and secured on its own engineered pallet; ready for safe transit to the field.

Shock-absorbing Core

Multiple layers of reinforced plywood and dense foam cushioning form the shock-absorbing core of every pallet.

Built in Deployment Ramps

Built-in ramps attach directly to the pallet, letting installers roll the cabinet safely into place.

Corner & Vibration Protection

Integrated foam cushioning blocks isolate the cabinet from vibration and impact throughout shipping and handling.

Ship protected. Deploy faster. Every Minuteman cabinet. Every time.

Pre-Configured at the Factory. Protected to the Floor.

A fully loaded cabinet represents a significant investment. Minuteman Power Cabinets arrive with the UPS and battery system already installed and tested at the factory. Your team can integrate additional equipment at your facility, then reuse the same shock-absorbing pallet and protective packaging to deliver the complete solution safely to the customer site.

This approach reduces on-site installation time, lowers deployment costs, and minimizes handling risk while maintaining consistent, factory-level protection from start to finish.

What's Protecting Your Cabinet?

- Custom shock-absorbing pallet system
- Protection against vibration and transportation impacts
- Secure cabinet anchoring during transit
- Supports pre-integration of equipment before final shipment
- Heavy-duty corner protection and stretch wrapping
- Clear freight handling and safety labeling
- Integrated ramps for easy cabinet deployment
- Reduced installation and commissioning time
- Ideal for mission-critical power environments

Ship protected. Deploy faster. Every Minuteman cabinet. Every time.

Every cabinet ships fully loaded, fully protected, and ready to power on arrival. That's peace of mind, built in. Questions? Contact sales@minutemanups.com.
